Title: Storia della Navigazione a Vapore e dei Servizi Postali sul Mediterraneo 1840-1850 Vol. 2

ISBN/ISSN: 978-88-907450-2-7

Publisher: The Postal Gazette

Year of publishing: 2016

Current edition: 1st

Quantity: 500

Description: Volume II deals with the history of steamships of the Kingdom of the Two Sicilies and of the Grand-Duchy of Tuscany during the decade from 1840 to 1850. Their role in the conveyance of mails of various States to destinations in the Mediterranean, including the islands of Corsica, Malta and Sicily is the focus of this volume.

During these years the steamship fleet of King Ferdinand II was increased, and privately owned steam navigation companies also strengthened their presence and capabilities. At the same time we learn about the growth and demise of the Tuscan steamship navigation era, as well as the story of the Valery Bros. Steam Packet Company that monopolized the sea route between Bastia and Livorno.

The uprisings era that characterized 1848 and 1849 has been painstakingly examined, thus providing reliable and detailed information about the steam packets utilized to convey mail between Naples and Sicily during the Sicilian insurgency months. In Italian Language.
